

Reinventing the Oil and Gas Value Chain

Marina Trinca Vespan, Managing Director

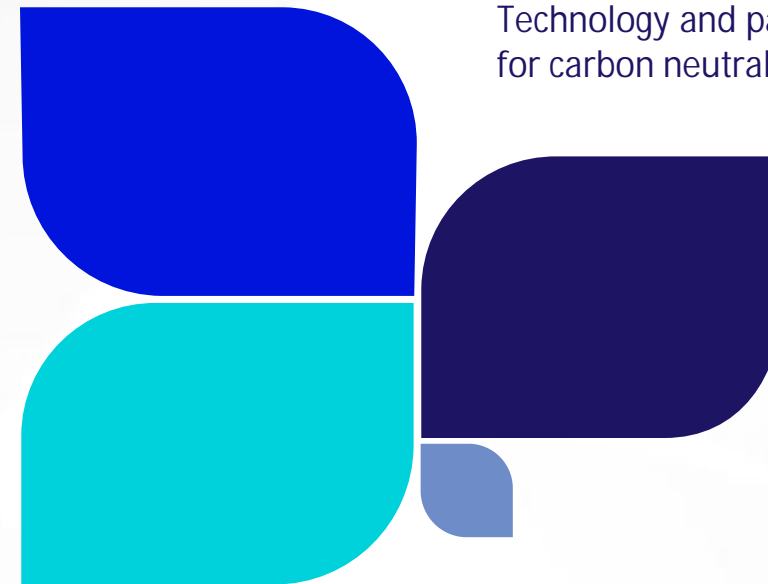

SLB's Decarbonization Framework

Technology-led
emissions reduction

Reduce
emissions in SLB
operations
Increased use of
renewables, supplier
engagement, and digital
technology

Scale New Energy
systems

Technology and partnerships
for carbon neutral or negative solutions

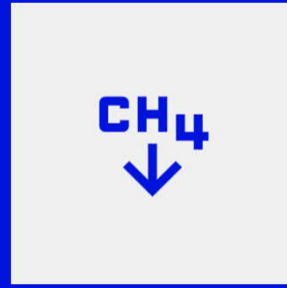

Lower oil and gas customer emissions

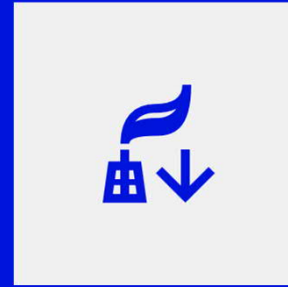

Reducing emissions in oil and gas operations through innovative
technologies and services

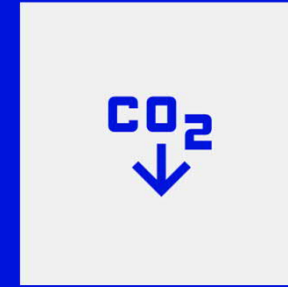

Innovation for Resilience and Sustainability

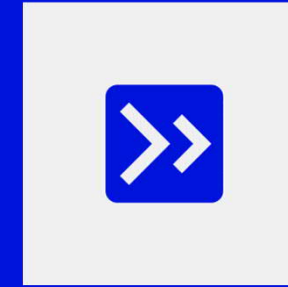

Address methane emissions

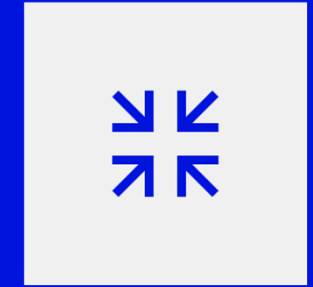

Reduce or eliminate flaring

Minimize well construction footprint

Electrification of infrastructure

Full field development solutions

The Power of Digital

Subsurface

Innovating at scale
and speed

Operations

A step-change
in efficiency

Decarbonization

Delivering
emissions insights

New Energy business portfolio

Geothermal and Geoenergy

Carbon Solutions

Hydrogen

Critical Minerals

Stationary Energy Storage
